SUMMARY

Seasoned web developer with a Bachelor's Degree in Information and Communication Technology, offering a robust two-year track record at Gorilla Group Limited - The Gulu (Hong Kong). Specialized in both front-end and back-end development, showcasing a high level of expertise in delivering innovative solutions.

SKILLS

Proficient in Front-end Side: HTML5, CSS3, JavaScript and React
Strong Knowledge of Server-side Languages: JAVA, PHP and Node.js
Experience with Database Management Systems: MySQL and MongoDB
Tools: VS Code, Git, Postman, Spring Framework
Experience with RESTful API development and integration

PROFESSIONAL EXPERIENCE

Gorilla Group Limited - The Gulu (Hong Kong) | *Website Developer (Frontend)* JUN 2020 – JUL 2022

- * Built and maintained responsive CMS website and web apps using HTML5, CSS3, JavaScript, React, and Redux, yielding visually appealing, functional, and user-centric digital solutions.
- * Leveraged Restful API for seamless data exchange, collaborated with cross-functional teams, gathering project requirements and ensuring timely product delivery.
- * Proactively interacted with web users, enhancing communication and user experience, resulting in improved satisfaction, increased engagement, and enhanced user retention.
- * Conducted thorough testing and debugging, meticulously resolving issues, resulting in high-quality, error-free deliverables, ensuring seamless user experience and client satisfaction.

Application Technology Co. LTD. (Hong Kong) | *Software Developer (Summer Internship)* JUN 2019 – AUG 2019

- * Developed and maintained a CMS website using HTML5, CSS3, and PHP, resulting in a functional and dynamic website with robust content management capabilities.
- * Implemented AI tagging for machine learning algorithms to automatically assign relevant tags to various content items, resulting in improved searchability.

PROJECTS

Develop a Comprehensive Product Price APP with Admin Website SEP 2019 – MAY 2020

- Technological and Higher Education Institute of Hong Kong (Hong Kong)
- Created a product price comparison app using React, enabling users to easily compare prices and make informed purchasing decisions
- Constructed an admin website using Node.js and MongoDB, facilitating efficient information management for the app's backend
- Published to GitHub (FYP-Web-Server-and-Mobile-App)

Develop a website tailored specifically for HKPA JAN 2018 – MAY 2018

- Technological and Higher Education Institute of Hong Kong (Hong Kong)
- Assisted HKPA in creating their own website using HTML5, PHP, and a database, incorporating information, updated admin page, advertisement slider, photo/video section, and photo gallery.
